

MCYRA Approved 10 April 62

Revised 21-JAN-2006

NOTES:

- (1) Deleted
- (2) Mast may be stepped on keelson or on a block between frames 3 & 4. Block cannot be more than 7-1/2 inches higher than the top face of the keelson.
- (3) Forward edge of mast opening (at deck) cannot be less than 63" from station 0.
- (4) Upper stay (thru deck location) 4 inches maximum aft of mast centerline, and 18 inches minimum from side of mast.

- (5) Lower stay (thru deck location) no less than 18 inches off centerline of deck.
- (6) Length of strut is from face of mast to wire.
- (7) The projection points of the lower and jumper shrouds at intersection with the mast shall not be more than 5 inches above or below their center line of spreader.
- (8) When multiple mast bands are used, the individual bands shall be spaced at least 5 inches from bands in the set. Different and contrasting colors shall be used for each set of bands.

RIGGING PLAN
MERCURY CLASS YACHT
Revised to comply with IRC 2003
